MARGRAF

Margraf holds a long-standing expertise in the extraction and transformation of natural marble through advanced industrial processes and deep material knowledge.

The Ipogeo® finish was born as a reflection of this approach, exploring marble through a different perspective, uncovering its untamed, native form.

**ARCHI-
TETTURA
SONORA**

Architettura Sonora is part of B&C Speakers Group.

All Architettura Sonora systems are built using B&C drivers, ensuring sound performance, reliability, and precision consistent with professional audio standards.

Each project integrates its acoustic foundation within architectural research and natural materials.

MARGRAF INNOVATION LAB &
ARCHITETTURA SONORA

Margraf's marble expertise meets Architettura Sonora's
acoustic engineering to explore matter and sound.

PHILOSOPHY

Stone carries time, sound plays with movement and space.

Together, they form a sensory architecture rooted in the rhythm of natural materials.

The collaboration between Architettura Sonora and Margraf Innovation Lab brings this dialogue where marble breathes and sound expands.

**GRIGIO
CARNICO**

**VEINED GRAPHITE DEPTH,
AUSTERE AND ARCHITECTURAL.**

A distinctive marble defined by sharp white veining across a deep grey surface.
Its natural density and durability make it suitable for both exterior applications and refined interior spaces.

BRECCIA IMPERIALE

WARM, DRAMATIC, SCULPTURAL.

A warm, stratified marble with complex mineral fragments. Its articulated surface and material richness soften resonance and diffuse sound, producing a full, enveloping acoustic experience.

BOLD CHROMATIC ENERGY

A deep red marble with layered tonal variations and fine white veins. Its mass and chromatic intensity enhance sound depth and presence, combining acoustic stability with a strong sculptural character.
